MIDLIFE IN THE UNITED STATES: A NATIONAL STUDY OF HEALTH AND WELL-BEING

FUNDED BY THE NATIONAL INSTITUTE ON AGING

MIDUS Refresher 1 Project 5

Abstract

The MIDUS Refresher Neuroscience Project studied 138 participants from the Refresher sample. These respondents included two distinct subsamples, all of whom completed both the Survey Project and the Biomarker Project's assessment at the University of Wisconsin-Madison: the Main Refresher (n = 93) and Milwaukee Refresher (n = 45) samples. The purpose of the Neuroscience Project is to examine the central circuitry associated with individual differences in affective style that represent a continuum from vulnerability to resilience, and to characterize the peripheral consequences of these central profiles for biological systems that may be relevant to health. The primary aims were to: (1) characterize individual differences in emotional reactivity, recovery, and sustaining processes using psychophysiological measures such as corrugator and zygomatic electromyography and eyeblink startle magnitude, (2) characterize individual differences in brain morphology and connectivity, in particular amygdala and hippocampal volume and prefrontal regional cortical thickness, using structural magnetic resonance imaging (MRI) and diffusion weighted imaging (3) characterize individual differences in activity within the neural circuitry of emotion using task and resting state functional MRI, and (4) test the ability of these indices to predict the comprehensive array of health, wellbeing, cognitive, psychological, social, and life challenge factors assessed in the other MIDUS projects. To probe individual differences in emotional processes the Neuroscience Project examined both psychophysiological and fMRI measures during the presentation of negative, positive, and neutral pictures, and these same measures during a post-picture period. Emotion-influenced memory was assessed at both the psychophysiological and imaging sessions: (1) Free recall of the presented affective pictures at the end of the psychophysiological session. (2) Memory and likeability ratings for neutral faces that were paired with the affective pictures in the imaging task (a neutral face was presented 2 s after each affective picture) as a probe of recovery processes. The logic of this strategy is that continued activation during the recovery period following a negative stimulus is indicative of poor negative emotion regulation, whereas continued activity during the recovery period following a positive stimulus is indicative of better sustaining of positive emotional responses. Finally, the emotional processing elicited by the affective pictures can continue beyond their presentation, depending on these individual differences in affective style, resulting in affective biasing or coloring of subsequently encountered events such as the neutral faces in the imaging task.

Dispositional Positive Emotion Scales

RA5SDPC01 - DPES01-I am generally a contented person

Type	Code
Pre-Question Text	In this series of questions we are interested in learning about your beliefs and feelings about the world, as well as some of your typical day-to-day actions. Each item below contains a statement. We want to know how strongly you agree or disagree with each of these statements. Think about each statement separately, and decide how much you agree with it. There are no right or wrong answers. For each statement, circle the number on the right for the number from 1 (strongly disagree) to 7 (strongly agree) that best represents your feelings.

Question Text	It's important to take care of people who are vulnerable
PreQuestionText	In this series of questions we are interested in learning about your beliefs and feelings about the world, as well as some of your typical day-to-day actions. Each item below contains a statement. We want to know how strongly you agree or disagree with each of these statements. Think about each statement separately, and decide how much you agree with it. There are no right or wrong answers. For each statement, circle the number on the right for the number from 1 (strongly disagree) to 7 (strongly agree) that best represents your feelings.

Question Text	If I see a chance to get something I want, I move on it right away
PreQuestionText	In this series of questions we are interested in learning about your beliefs and feelings about the world, as well as some of your typical day-to-day actions. Each item below contains a statement. We want to know how strongly you agree or disagree with each of these statements. Think about each statement separately, and decide how much you agree with it. There are no right or wrong answers. For each statement, circle the number on the right for the number from 1 (strongly disagree) to 7 (strongly agree) that best represents your feelings.

Question Text	I make jokes about everything
PreQuestionText	In this series of questions we are interested in learning about your beliefs and feelings about the world, as well as some of your typical day-to-day actions. Each item below contains a statement. We want to know how strongly you agree or disagree with each of these statements. Think about each statement separately, and decide how much you agree with it. There are no right or wrong answers. For each statement, circle the number on the right for the number from 1 (strongly disagree) to 7 (strongly agree) that best represents your feelings.

PreQuestionText	In this series of questions we are interested in learning about your beliefs and feelings about the world, as well as some of your typical day-to-day actions. Each item below contains a statement. We want to know how strongly you agree or disagree with each of these statements. Think about each statement separately, and decide how much you agree with it. There are no right or wrong answers. For each statement, circle the number on the right for the number from 1 (strongly disagree) to 7 (strongly agree) that best represents your feelings.

Emotional Regulation Questionnaire

RA5SER01 - ERQ01-When I want to feel more positive emotion (such as joy or amusement), I change what I'm thinking about

Type	Code
Pre-Question Text	We would like to ask you some questions about your emotional life, in particular, how you control (that is, regulate and manage) your emotions. We are interested in two aspects of your emotional life. One is your emotional experience, or what you feel like inside. The other is your emotional expression, or how you show your emotions in the way you talk, gesture, or behave. Although some of the following questions may seem similar to one another, they differ in important ways. For each item, please answer using the following scale:

RA5SER10 - ERQ10-When I want to feel less negative emotion, I change the way I'm thinking about the situation

Type	Code
Question Text	When I want to feel less negative emotion, I change the way I'm thinking about the situation
PreQuestionText	We would like to ask you some questions about your emotional life, in particular, how you control (that is, regulate and manage) your emotions. We are interested in two aspects of your emotional life. One is your emotional experience, or what you feel like inside. The other is your emotional expression, or how you show your emotions in the way you talk, gesture, or behave. Although some of the following questions may seem similar to one another, they differ in important ways. For each item, please answer using the following scale:

			Frequency	% of total	% of valid
Valid	1	STRONGLY DISAGREE	1	0.72%	0.74%
	2	MODERATELY DISAGREE	2	1.45%	1.47%
