MIDLIFE IN THE UNITED STATES: A NATIONAL STUDY OF HEALTH AND WELL-BEING

FUNDED BY THE NATIONAL INSTITUTE ON AGING

MIDUS 1 Project 1

Abstract

The Midlife in the United States (MIDUS) study is a collaborative, interdisciplinary investigation of patterns, predictors, and consequences of midlife development in the areas of physical health, psychological well-being, social responsibility, and many other topics.

The first wave of the MIDUS study (MIDUS 1 or M1) collected survey data from a total of 7,108 participants. The baseline sample was comprised of individuals from four subsamples: (1) a national RDD (random digit dialing) sample (n=3,487); (2) oversamples from five metropolitan areas in the U.S. (n=757); (3) siblings of individuals from the RDD sample (n=950); and (4) a national RDD sample of twin pairs (n=1,914). All eligible participants were non-institutionalized, English-speaking adults in the coterminous United States, aged 25 to 74. Data from the above samples were collected primarily in 1995/96.

The survey (Project 1) dataset contains responses from a 30-minute Phone interview and two 50-page Self-Administered Questionnaire (SAQ) instruments. Of the 7,108 respondents who completed the Phone interview, 6,325 also completed the SAQ. Respondents were asked to provide extensive information on their physical and mental health throughout their adult lives, and to assess the ways in which their lifestyles, including relationships and work-related demands, contributed to the conditions experienced.

The most current version of the M1 survey data includes:

• A set of weight variables for the national RDD sample;
• separate dataset containing the coded text and/or verbatim responses to open-ended questions in the Phone and SAQ;
• separate dataset containing responses to a Twin Screener instrument that was used at baseline to identify the first national sample of twin pairs ascertained randomly via the telephone.
The M1 wave also conducted other data collection on subsamples of the Project 1 sample. Project 2 (#3725) collected diary data about daily experiences and stress, while Project 3 (#3596) collected data cognition data.

Type	Code
Notes	Constructed variable, verbatim responses coded by UWSC using Census 1980 classification, for details see documentation "M1_P1_DocumentationOfOccupationCoding_20180724".
Comparability Notes	M1 used 1980 Census Bureau occupation and industry codes. M2 and MKE1 used 1990 Census Bureau occupation and industry codes. M3, MR1, MKER1, and MKE2 used 2007 classifications (https://www.bls.gov/tus/census07icodes.pdf) to code industry variables, and 2010 Census classifications (www.bls.gov/cps/cenocc.pdf) to code occupation variables. There are some differences in formatting between the 1990 and 2010 code lists (such as leading or trailing zeros), but all MIDUS occupation and industry variables can be harmonized using published crosswalks (for examples see https://usa.ipums.org/usa/volii/occ_ind.shtml).

A1PINSMJ - Spousal industry - major groups

Type	Code
Notes	Constructed variable, verbatim responses coded by UWSC using Census 1980 classification, for details see documentation "M1_P1_DocumentationOfOccupationCoding_20180724".
Comparability Notes	M1 used 1980 Census Bureau occupation and industry codes. M2 and MKE1 used 1990 Census Bureau occupation and industry codes. M3, MR1, MKER1, and MKE2 used 2007 classifications (https://www.bls.gov/tus/census07icodes.pdf) to code industry variables, and 2010 Census classifications (www.bls.gov/cps/cenocc.pdf) to code occupation variables. There are some differences in formatting between the 1990 and 2010 code lists (such as leading or trailing zeros), but all MIDUS occupation and industry variables can be harmonized using published crosswalks (for examples see https://usa.ipums.org/usa/volii/occ_ind.shtml).

A1POCCD - Father/Male head of household - occupation

Type	Code
Notes	Constructed variable, verbatim responses coded by UWSC using Census 1980 classification, for details see documentation "M1_P1_DocumentationOfOccupationCoding_20180724".
Comparability Notes	Not constructed in M2, M3, and MKE2 because this is a baseline question. M1 used 1980 Census Bureau occupation and industry codes. M2 and MKE1 used 1990 Census Bureau occupation and industry codes. MR1, MKER1, M3, and MKE2 used 2007 classifications (www.census.gov/people/io/methodology) to code industry variables, and 2010 Census classifications (www.bls.gov/cps/cenocc.pdf) to code occupation variables. There are some differences in formatting between the 1990 and 2010 code lists (such as leading or trailing zeros), but all MIDUS occupation and industry variables can be harmonized using published crosswalks (for examples see https://usa.ipums.org/usa/volii/occ_ind.shtml).

A1SF6A - Choose goals - Focus or keep options open

Type	Code

Question Text	When choosing my goals, my own strategy is more like - A: I prefer to choose one or two important goals and really focus on achieving them; B: I prefer not to limit myself - I keep my options open so I can take advantage of anything that comes up.
Pre-Question Text	The next few questions are about the way you decide what you want out of life and how you go about trying to achieve your goals. For each situation below, two different strategies are listed. Please indicate whether your own strategy is more like the one listed in column A or the one listed in column B. While they way you do things may be different depending on the particular goal, and may include parts of both strategies, please circle the answer that is true for you overall.

Type	Code
Question Text	CALM AND EVEN-TEMPERED - how much does this describe people in their late twenties?
Pre-Question Text	Please think about what people in general are like in their late twenties (25-30 years old), in their late forties (45-50 years old), and in their late sixties (65-70 years old). By people in general, we mean most people in the United States as you see them. Please rate how much you think each of the following characteristics describes most people in each age group, using a scale from 0 to 10, where 0 means it describes them not at all and 10 means it describes them very much (Please circle a number on every line.)

A1SH1 - Career psychological turning point

Type	Code
Question Text	In the past 12 months, did you have a psychological turning point that involved your job or career? This could be an experience like increasing the amount of effort you put into your job or career, cutting back on your job to spend more time with your family, deciding to change careers, now or in the future, or leaving your job to do something different.
Pre-Question Text	The following questions are about what we call "psychological turning points." Psychological turning points are major changes in the ways people feel or think about an important part of their lives, such as work, family, and beliefs about themselves and about the world. Turning point involve people changing their feelings about how important or meaningful some aspect of life is or how much commitment they give it.

A1SH2 - Upset for friend psychological turning point

Type	Code
Question Text	First, in the past 12 months, have you had a psychological turning point like this where you learned something very UPSETTING about a close friend or relative?
Pre-Question Text	Another kind of psychological turning point involves learning something new and very important about a person close to you. What these turning points have in common is the REALIZATION that this person is NOT THE PERSON YOU THOUGHT THEY WERE, either for the better or for the worse. This could be things like someone close to you making a major change for the better, finding out that he or she is doing something you disapprove of strongly, or learning that he or she is a stronger person than you thought.

A1SI15C - Work nights in average week (frequency)

Type	Code
Backward Skip	(IF R NEVER HAD A PAID JOB)
Question Text	Now think about your current job(s). In an average week, how often do you work during the day, in the evening, at night (including being away overnight for work-related travel), or on the weekend? NIGHTS - ANY TIME BETWEEN 9:30PM AND 4:30AM, OR OVERNIGHT.
Notes	Respondents were instructed to skip Question SI7 through SI31f if they had never had a paid job for 6 months or more, full-time or part-time. SAQ skip was self-defined by the respondent, therefore the skip patten may not match perfectly.
BackwardSkip	(IF R NEVER HAD A PAID JOB)

A1SJ9 - Spouse/partner's wages last calendar year

Type	Code
Question Text	What was your spouse's or partner's earnings income in the past 12 months, before taxes? Count only wages or other stipends from his or her employment, not pensions, investments, or other income. Again, please write down the correct letter from the list above. (Your best estimate is fine. If you have no spouse or partner, enter "B".)
Comparability Notes	Wording change in M2 question: M1 asked income questions for the past 12 months, although other waves asked for the last calendar year; Wording change in MR1 response category: Changed from 'Personal earning income (Counts only wages and other stipends from your own employment; Not pensions, investments, or any other financial assistance or income)' to 'Wages, salaries and other stipends from all your jobs, including self-employment? Do not include pensions, investments, or any other financial assistance or non-wage income.' M1, M2, and MKE1 variables top-coded at $200k; MR1, MKER1, M3 and MKE2 variables top-coded at $300k.

Type	Code
Notes	Constructed variable, for details see "M1_P1_DocumentationOfScalesAndConstructedVariables_20140826".
Comparability Notes	The computation of the MR1 and MKER1 total income variables did not include the separate variable that measures total household government assistance income. MKE2 data collection error occurred; Social Security and Other income measures were skipped for Spouse (CAGS9C, CAGS9D) and Family Member (CAGS10C, CAGS10D) as a result of UWSC programming bug. A1SJ14 - Money left or owed if cashed in and paid off debt

Type	Code

Question Text	Suppose you (and your spouse or partner) cashed in all your checking and savings accounts, stocks and bonds, real estate, sold your home, your vehicles, and all your valuable possessions. Then suppose you put that money toward paying off your mortgage and all your other loans, debts, and credit cards. Would you have any money left over after paying your debts or would you still owe money?
Comparability Notes	Question format changed since MR1: MR1, MKER1, M3, and MKE2 used one question to determine status and amount, although previous waves used two separate questions; Wording change in response category.

A1SJ15 - Amount you would owe or have

Type	Code
Question Text	How much would that be (that you had left over, or would owe)? Again, please write down the correct letter from the list on the previous page. (Your best estimate is fine. If your debts would just about equal your assets, enter "B".)
Comparability Notes	M1 variable A1SJ15 and MKE1 variable BACGS24 are not directly comparable with other waves: the 'amount you would owe' or the 'amount you would have' were coded into one variable for M1 and MKE1, while other waves broke out them into two separate variables. MR1, MKER1, M3, and MKE2 used one question to determine status and amount, while previous waves used two separate questions.

A1SP37 - Spouse/partner job commute time - number of minutes

Type	Code
Backward Skip	(IF R DOES NOT HAVE A SPOUSE/PARTNER OR A1SP31 = NO)
Question Text	How long does it usually take your spouse or partner, round-trip, to get to and from work? (If he or she works at home, enter "0".)?
Notes	Respondents were instructed to skip section P if they did not currently have a spouse or partner. SAQ skip was self-defined by the respondents, therefore the skip patten may not match perfectly.
BackwardSkip	(IF R DOES NOT HAVE A SPOUSE/PARTNER OR A1SP31 = NO)
Comparability Notes	M1 variable A1SP37 is not directly comparable with M2, MKE1, MR1, MKER1, M3, and MKE2: M1 responses were coded as number of minutes in a single variable, while other waves broke out number of hours and number of minutes into two separate variables.
