MIDUS

Midlife in the United States

A National Study of Health & Well-Being

MIDUS Refresher Project 1

MIDLIFE IN THE UNITED STATES: A NATIONAL STUDY OF HEALTH AND WELL-BEING

FUNDED BY THE NATIONAL INSTITUTE ON AGING

MIDUS Refresher Project 1

Abstract

In 2011-2014, the MIDUS Refresher study recruited a national probability sample of 3,577 adults, aged 25 to 74, designed to replenish the original MIDUS 1 baseline cohort and paralleling the five decadal age groups of the MIDUS 1 baseline survey. The MIDUS Refresher survey employed the same comprehensive assessments as those assembled on the existing MIDUS sample, but with additional questions about the effect of the economic recession of 2008-09. The survey data collection (Project 1) consisted of a 30-minute phone interview followed by two 50-page mailed self-administered questionnaires. Survey data were collected on demographic, psycho-social, and physical and mental health information. This new cross-sectional MIDUS sample allows the examination of period effects on health (mental and physical) related to the economic recession by comparing the pre-recession MIDUS 1 sample with the post-recession MIDUS Refresher sample. A further objective of the MIDUS Refresher sample was to strengthen cross-project analyses in MIDUS by increasing the sample sizes available for testing hypotheses dealing with the interplay of key factors (e.g., socioeconomic status, gender, psychosocial factors, biological factors) in mid- and later-life health. To that end, the MIDUS Refresher sample followed the same multi-disciplinary protocol established in the main MIDUS sample, in that after completing the survey protocol respondents were asked to complete a cognitive assessment by phone (Project 3) and later became eligible to participate in daily diary assessments (Project 2), biomarker assessments (Project 4), and neuroscience assessments (Project 5).

RA1SA26A

Label
Vigorous job activity frequency (summer)

preQTxt
The next section asks about various "levels" of physical activity (vigorous, moderate, light) - while at your job, while at home, and during your leisure/free time. Please answer each question thinking first about summertime, and then about wintertime. (If the question does not apply to you, for example, because you do not have a paid job or are retired, please circle 6 for "Never.") Vigorous physical activity causes your heart to beat so rapidly that you can feel it in your chest and you perform the activity long enough to work up a good sweat and are breathing heavily. Examples include: competitive sports like running, vigorous swimming, or high intensity aerobics; digging in the garden, and lifting heavy objects.

qstnLit
How often do you engage in vigorous physical activity - WHILE AT YOUR PAID JOB...DURING THE SUMMER?

Label
Respondent's wages last calendar year

preQTxt
The next several questions ask about the different sources of income you, your spouse and other family members in your household may have had over the last calendar year. You may need to consult your records to answer some of these questions. Please take the time to do that. Refer to the table below and fill in the letter that represents the correct range of income for each item listed.

qstnLit
Think about the income you earned in the last calendar year from each source listed below. In the last calendar year, what was your income from - WAGES, SALARIES AND OTHER STIPENDS FROM ALL YOUR JOBS, INCLUDING SELF-EMPLOYMENT? DO NOT INCLUDE PENSIONS, INVESTMENTS, OR ANY OTHER FINANCIAL ASSISTANCE OR NON-WAGE INCOME.

ivuInstr
(Please fill in the letter representing the amount of pre-tax income you earned from that source. If you have earned no income from a source, enter letter “B” in the space provided.)
