

Publications using the Neuroscience Project's MIDUS 3 data should acknowledge the MIDUS 3 U19 grant and the UW Waisman Center grant.

Sample Acknowledgements Text for MIDUS U19:

This work was supported by a grant from the National Institute on Aging (U19 AG051426) to follow-up the core MIDUS (Midlife in the U.S.) study sample for a 3rd timepoint, and by the Waisman Center from the National Institute of Child Health and Human Development (P50HD105353) to support the psychophysiological and neuroimaging data collection at the Waisman Center. The original MIDUS study was supported by the John D. and Catherine T. MacArthur Foundation Research Network on Successful Midlife Development.

Waisman Center Publications Policy as of 4/3/23

1. Please acknowledge in your manuscript “**Waisman Intellectual and Developmental Disabilities Research Center (Waisman IDDRC), P50HD105353**” if your research used the center's resources in any way, in full or in part. This is true of all MIDUS Neuroscience Project data which were collected in the Waisman Brain Imaging Core facilities (including the psychophysiological data).
2. Please make sure your paper has a PMCID assigned to it if eligible, not just a PMID. Without a PMCID, your papers cannot be included in the Waisman Center's annual report to the NIH. The NIH uses a database that auto-generates the final publications list by PMCID.
3. Please forward a pdf of your in-press research papers to the Director's Office, via Teresa Palumbo (palumbo@waisman.wisc.edu). We appreciate being informed of center-supported research that will be published soon, and we may wish to consult with you to plan a news release or a Waisman Center web news item, with your approval, of course.
