

Publications using the Neuroscience Project's Refresher data should acknowledge the MIDUS Refresher P01 and the UW Waisman Center.

Sample Acknowledgements Text for MIDUS P01:

This work was supported by a grant from the National Institute on Aging (P01-AG020166) to refresh the sample of the MIDUS (Midlife in the U.S.) study, and by the Waisman Intellectual and Developmental Disabilities Research Center (Waisman IDDRC), P30HD03352. The original MIDUS study was supported by the John D. and Catherine T. MacArthur Foundation Research Network on Successful Midlife Development.

Waisman Center Publications Policy as of 8/31/12

1. Please acknowledge in your manuscript "**Waisman Intellectual and Developmental Disabilities Research Center (Waisman IDDRC), P30HD03352**" if your research used the center's resources in any way, in full or in part. This is true of all MIDUS Neuroscience Project data which were collected in the Waisman Brain Imaging Core facilities (including the psychophysiological data).
2. Please make sure your paper has a PMCID assigned to it if eligible, not just a PMID. Without a PMCID, your papers cannot be included in the Waisman Center's annual report to the NIH. The NIH uses a database that auto-generates the final publications list by PMCID.
3. Please forward a pdf of your in-press research papers to the Director's Office, via Teresa Palumbo (palumbo@waisman.wisc.edu). We appreciate being informed of center-supported research that will be published soon, and we may wish to consult with you to plan a news release or a Waisman Center web news item, with your approval, of course.
