

MIDJA Survey

MIDJA Survey

Abstract

The MIDJA study is a probability sample of Japanese adults (N = 1,027) aged 30 to 79 from the Tokyo metropolitan area. Survey data were collected on sociodemographic characteristics (age, gender, marital status, educational status), psychosocial characteristics (e.g., independence/interdependence, personality traits, sense of control, goal orientations, social support, family obligation, social responsibility), mental health (depression, anxiety, well-being, life satisfaction), and physical health (chronic conditions, health symptoms, functional limitations, health behaviors). These measures parallel those in a national longitudinal sample of midlife Americans known as MIDUS (ICPSR 4652: MIDUS 2 and ICPSR 2760: MIDUS 1). The central objective is to compare the Japanese sample (MIDJA) with the United States sample (MIDUS) to test the hypothesis that the construct of interdependence predicts well-being and health in Japan, whereas the construct of independence predicts well-being and health in the United States. Cultural influences on age differences in health and well-being are also of interest.

Pre-Question Text	The following questions ask about your feelings and thoughts during the last month. For each question, answer by circling how often you felt or thought a certain way. The best approach is to answer each question fairly quickly. That is don't tyr to count up the number of times you felt a particular way, but rather indicate the answer that seems like a reasonable estimate.
Question Text	In the last month, how ofter have you - BEEN UPSET BECAUSE OF SOMETHING THAT HAPPENED UNEXPECTEDLY?

			Frequency	% of total	% of valid

Question Text	Think of this ladder as representing where people stand in their communities. People define community in different ways; please define it in whatever way
	is most meaningful to you. At the top of the ladder are the people who have the highest standing in their community. At the bottom are the people who have the lowest standing in their community. Where would you place yourself on this ladder? Please check the box next to the rung on the ladder where you think you stand at this time in your life, relative to other people in the community with which you most identify.

SJ1SL17 - Who	does more	household	chores ((R or SP)	
TOLIT VVIIO	docs more	Houselloid	CHOICS ((1, 0, 0, 1)	

Туре	Code
Question Text	Running a household involves a lot of chores (like cooking, shopping, laundry, cleaning, yard work, repairs, and paying bills), and couples vary in who does these things. Overall, do you do more of such chores, does your spouse or partner do more of them, or do you split them equally? If you have children, do not count childrearing tasks such as bathing them, taking them places, or helping them with their homework, but do include chores like doing their laundry, washing their dishes, or cooking for them.
